#Some STD fun-facts:

- 1. HIV, Hepatitis B and Herpes are not completely curable.*
- 2. Chlamydia and Gonorrhoea scar the fallopian tube and often cause sterility and ectopic pregnancies.*
- 3. Human Papilloma Virus (warts virus) also is responsible for increasing chances of cervical cancer.*
- 4. Hepatitis B and HIV spread thru other means as well, syringes and stuff.*
- 5. Pelvic inflammation always results from bacterial infections, probably gone untreated.
Chlamydia and Gonorrhoea mostly.*

#Contraceptives fun-facts:

1. Saheli

- non steroidal preparation*
- “Centchroman”*
- high contraceptive value*
- low side effects*
- anti-estrogenic in action*

2. Lactational Amnorrhea

- Prolactin blocks GnRH.*
- No GnRH ergo no LH/FSH.*
- and no LH/FSH means no ovulation.*

3. Implants

- 6 matches.*
- 5 years.*
- Progestogen deal.*

4. Copper Ts

a) Non-medicated

- induce sperm phagocytosis.*
- eg- Lippe's loop.*

b) Copper-ion furnishing

- decrease sperm motility and fertilization capability too.*
- eg- CuT, Cu7, Multiload.*

c)Hormone furnishing

- mainly progesterone which blocks cervix in addition to above said.*
- eg- Progestasert, LNG.*
